

# OI CLINIC DIRECTORY

from the OIF Information Center

Welcome to the 2019 OIF Clinic Directory! The OI Foundation recognizes that one of the difficulties that many OI community members face is finding a team of medical professionals who are familiar with working with this disorder. The purpose of this directory is to provide you and your family with accurate, verified, and easily accessible information to assist you in locating dependable multidisciplinary medical care.

All information included in the directory is provided by a representative of each clinic. Please note that this list is offered as a service. Being listed does not indicate that the OI Foundation endorses services and quality of care provided by these institutions. It is the responsibility of parents and adults with OI to verify whether a particular medical team meets their needs.
